Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vlach

(3,899,179) in view of Adlam (5,240,254) or Karkoska (2,128,049). Regarding claims 1, 6 and

7, Vlach discloses a golf tee holder (note Figure 8) comprising a plurality of legs (52', 54', 80',

100) extending outwardly from a base (noted generally at 20). The legs extend to the right and

left sides of the base and fore of the base. The holder also includes an opening (26') for

receiving a golf tee. However, the claim uses the closed language "consisting" and recites only a

fore leg, a right leg and a left leg.

Both Adlam and Karkoska disclose golf tees consisting of a leg extending fore of the base and legs extending to the right and left of the base. It would have been obvious to one of ordinary skill in the art to remove the leg that extends to the rear of the base in the training aid of Vlach in order to provide a simpler and cheaper device by requiring less material for manufacture.

Regarding claims 2-5 and 8-12, note the basis for these rejections set forth in the first Office Action as Vlach still teaches or renders obvious the recited limitations in these claims.

Response to Arguments

3. Applicant's arguments filed May 20, 2005 have been fully considered but they are not persuasive. The applicant argues that the claimed invention requires only three legs whereas the

Art Unit: 3711

invention of Vlach requires four legs. The rejection has been changed to include the teachings of Adlam or Karkoska. Both Adlam and Karkoska teach that it is well known in the art of golf to provide training aids with only three legs for orienting the golfer. To eliminate the rear leg in the device of Vlach would have been obvious to one of ordinary skill in the art in order to provide a simpler and cheaper device that requires less material for manufacture.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

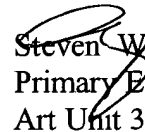

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
